Themes of Geography ABC Book

In class we have discussed the 5 Themes of Geography. We will see these often as we study different eras of US History this year. This project will help you further understand the themes.

Directions: Working individually or in pairs, you will create an ABC book (you will see a sample in class) where you will describe a place using the 5 Themes of Geography. An ABC book is a project where you describe things by choosing a key word to go with each letter of the alphabet.

Components:

- Your ABC book will describe your assigned state using the 5 Themes of Geography
- Your book must have a title slide.
- You will address every theme. Use the following guidelines **for a minimum** of how many 'letters' for each theme:

    - Location — Absolute – 1 letter; Relative – 2 letters
    - Place — 3 letters
    - Human- Environment Interaction — 3 letters
    - Movement — 2 letters
    - Region — 1 letter

- You may choose which 12 letters to use, but you can only use each letter once and the letters must be in the presentation in ABC order
- You must have a picture for at least half of the letters used
- Slides must have backgrounds and transitions. Animations are optional.

Format: PowerPoint or Prezi. Work will be saved in your Y drive. The title of the file must be – [last name] themes ABC book **Ex:** Warth Themes ABC book

Time frame: Students will work for 3-4 days in social studies class. Any work not completed in that time frame will be completed on your own time.

Project due: **Friday, September 28, 2018.**

Grading:

	Points Possible	**Points Earned**
Title	10	
Pictures	18	
Themes information	72 (12 per component)
